routes

Intuitive. Performance. Comfort.

Designed in partnership with PearsonLloyd, Routes is a collection of work tools driven by the concept, “What do we need, really need, to work efficiently and well?” The collection is made up of furniture, lighting and accessories, given fresh yet familiar forms that are easy to understand and to specify; easy to assemble, configure and use.

Routes departs from conventional contract furniture with a toolbox of boldly conceived products that are simple and able. The collection allows one to build-up a complete workspace for a small, tight-knit studio or create casual “pop-up” work hubs across the expanse of a corporate headquarters. Routes readily adapts to spaces big and small, to the requirements of an established enterprise and to the needs of those who work at home. Agile and mobile, Routes encourages people to move about and to move their furniture around, to make or unmake a space in which to think, meet or create.

Routes provides a balanced portfolio of high-performance work tools: tables, seating, storage and screens, as well as accessories, lighting and a coordinated selection of textiles. The Coat Stand, Rocking Chair and Table Lamp offer a familiar residential look and feel. A quirky Three Leg Stool takes inspiration from a ready-made utility object—a tractor seat—and offers the user ease of stepping on or off the stool. A Mobile Soft Screen, Multi-Use Stool and Adjustable Side Table fulfill the intention to provide furniture that’s as agile and as robust as possible.

Infused with a simple, direct functionality, Routes adds an expressive element through vivid accent colors Blue Sage and Signal Red. Equally, the seamless bold curves of tubular steel are among the expressive shapes that give character to the collection. Routes offers a radically new profile and materiality for furniture for work environments.

Economy of means is intentional. Routes is a carefully considered collection of durable, well-constructed furniture designed to perform, to last and to be repurposed at end-of-life. Routes also averts the usual complexity of choosing and ordering furniture. An accessible online platform simplifies specification and expedites product delivery.

byward

Simple. Versatile. Affordable.

Offering a fresh approach to casegoods design, Byward is about doing more with less. Composed of ten core products, the collection combines streamlined design, dimensions and construction to cost-effectively meet essential needs.

Byward provides a classic built-in look with flexibility to adjust over time. Lending a familiar residential look to the office, pieces are scaled to optimize space in the pared-down footprint of today's private office or shared work hub. Cabinets and tower dimensions are trimmed from a standard depth of 20-24 inches to a lean 14 inches deep.

Casual, intuitive and easy to use, Byward enables a range of planning and aesthetic options. All desk and storage units are freestanding, readily adapting to changes in workflow or space allocation.

Desks incorporate a power bar and unobtrusive wire pathways to support technology, keeping wires against the wall and out of sight. Storage units feature a signature leather pull and elevated base with shelf, providing added functional capacity. A Wall Shelf provides coat hooks and trays to support personal items.

Byward achieves a high level of fit and finish through standard material and finish options. Finishes include Teknion's Flintwood, Veneer 2/3, and twelve popular solid colors and wood grain laminates. Accent colors can also be applied to infuse a touch of personality.

Adding further versatility, Byward integrates with Teknion Journal and Expansion Casegoods to provide drawer options, height-adjustable worksurfaces and additional storage.

Inspired by the heritage of Canadian forestry, the name Byward pays tribute to the history of Ottawa and its original name, Bytown. Once a major trading center for the logging industry and timber products, Ottawa today is home to the renowned ByWard Market, one of Canada's largest public markets. Defined by a name both contemporary and rich in tradition, the Byward line of essential wood furniture projects an image of timeless quality.

## visio

Visio elevates the affordable work chair. Simple and polished, Visio has a lighter scale and a slim, graceful profile with mesh back that molds to the body for essential support. A comfortable chair with refined details, Visio offers discreet ergonomics that suit the corporate or residential setting.

Visio features everything required in a work chair. Designed to fit most body types, an adjustable lumbar support bolsters proper alignment and posture. The seat and arm rests can be raised or lowered while the seat depth moves forward or back, accommodating user preferences. The chair back tilts and locks in three positions or freely reclines, permitting a seamless shift from one task to another.

The Visio frame is available in Ebony or Grey. Fabric choices include Visio Grey or Visio Black, plus ten choices from the Luum Percept palette, with colors ranging from warm neutrals to rich, deep tones. Visio achieves a high level of aesthetics and performance, designed only with what is essential.

## metric

Metric gives task seating fresh possibilities with a trio of upholstery concepts – single fabric, dual fabric and a mixed upholstery option. Unique to Metric, a double layer of cushioning allows for one fabric to be applied to the seat and inner back, and a second fabric to the seat underside and outer back. This distinctive mixed upholstery option invites expressive combinations of color, pattern and texture to convey a message or create a mood.

Shaped and cushioned for comfort, Metric reveals a residential influence and flair. The visual experience is soft and receptive. Function is intuitive and effortless with simple adjustments for seat height and tilt that adapt to the task at hand.

Smartly suited to the office or the study, Metric is offered in all grades of Luum textiles, providing a vast array of color, fiber and performance choices. The frame finish is offered in Ebony.

## carrier desk

The Carrier Desk is a classic writer's desk designed to work well with today's technology, cleverly incorporating built-in functionality and commercial performance. The desk surround keeps tools and accessories neatly contained, with the option for an additional desktop riser that creates a second surface. The Carrier Desk's slim profile is also suited for the home, seamlessly blending with residential furniture and able to fit into a small nook or corner. It is also designed to be easily shipped and assembled.

Features include:

- 42 inches wide by 24 inches deep
- Desktop Riser is available separately – functions as a secondary surface on a table or desk and elevates a laptop/monitor for improved posture
- Integrated charging tray and organizers, lined with soft felt, store small items and discreetly route wires for easy cable management
- Desk leg levelers adjust up to one inch
- Constructed with laminate surfaces and painted metal legs
- Color and finish combinations include:
  - Dark Timeless & Classic – Provincial Oak desktop with Foundry Onyx legs
  - Warm & Comfortable – Campus Oak desktop with Atrium White legs
  - White & Light – Ivory Birch desktop with Atrium White legs

## mini focus den

The Mini Focus Den is a portable, lightweight tabletop screen that can be placed on existing furniture to create a mini desktop carrel for focused work. The Mini Focus Den provides personalized space across long benching or communal tables in office and academic environments. It also functions as an add-on accessory for storage, cable management and to minimize glare. The Mini Focus Den is also suited to WFH applications, aiding workers who live in spaces with no dedicated workspace, or workers using common shared spaces, achieve a personalized work area.

Features include:

- Smooth felt material offers acoustic dampening properties and a soft, tactile experience
- Shelves are offered in three accent colors to coordinate with other furnishings
- Top shelf organizes personal effects, work tools and gadgets
- Bottom shelf, with smooth felt liner, holds mobile devices and tucks away items not in use
- Bottom shelf also conceals electrical power bars, laptop adapters and loose cabling
- Cable tray and pass-thru for wire management

Designed for a more adaptable and agile workplace, WithIn is a simple post-and-beam structure that defines an interior space. WithIn subdivides the open plan into different zones, creating areas in which people can work as a group or personal spaces that serve a more intensive focus. WithIn creates an independent framework for both permanent and transitional spaces, allowing companies to readily adjust to new work behaviors and patterns.

Expanding the range of design options, WithIn accepts varied infills suited to purpose and function. WithIn integrates with Altos and Optos architectural walls, Altos Light and Desk, the Tek Vue glass office-front system and Tek Pier, which pairs a wall-integrated worksurface with a monitor. In addition, the breadth of Teknion's furniture portfolio allows for fresh, creative approaches to spaces for gathering or focusing.

WithIn, together with products from Teknion's POD (Privacy on Demand) series, allows a quick response to changing needs—without incurring the costs associated with conventional drywall construction, including the costs of additional building utilities.

Teknion's extensive Architectural Interiors program makes it possible to configure workspaces with the dimensions, function, technology and visual/acoustic privacy required for an array of possible futures.

## studio tk - vettore

Vettore is a modular lounge system designed with classic, tailored sensibilities while offering an efficient modularity to adapt to evolving flexible work space. Designed by Toan Nguyen, Vettore configures within any environment to create intimate lounge settings or fill spacious public scenarios. Built on a universal base “stage”, Vettore allows for unlimited user specification with upholstered or table components to create a customized sofa to fit their needs. Vettore, Italian for “vector” or “array”, divides space comfortably and adds elegance to thoughtful casual work styles.

The selection of individual components allows for contrasting textiles and finishes for endless possibilities. Every sofa is custom to every environment. Vettore avoids the conventional modularity of freestanding components and adds a visual lightness to a space through a low profile base.
